Front End Developer

SUMMARY

I have around 2 years of experience. I've crafted stand-alone and responsive websites, focusing on React JS to build dynamic single-page applications (SPAs). My expertise lies in React components, form events, key management, routing, and the development of interactive user interfaces utilizing one-way data flow, virtual DOM, and JSX principles. I've actively contributed to Agile teams, participating in sprint planning, daily standups, and sprint retrospectives, ensuring efficient project delivery and continuous progress.
